

Bosnian alphabet characters in L^AT_EX

Bosanska slova u L^AT_EXu

by eddsn.com

September 16, 2009

English:

You'll find here the characters with their corresponding latex command. In two cases with the letters **đ** and **Đ** you should include the listed package because there is currently no standard support for it (at least not known to me). This should anyway do the trick.

Bosanski:

Tabela ispod pokazuje sva naša slova i u koloni pored kod za latex. Kod dva slučaja, kod slova **đ** i **Đ** je potrebno instalirati dodatni paket pošto ova slova nisu standardno podržana (to je barem kod mene trenutno slučaj). U svakom slučaju će ovo dati željeni rezultat.

Letter printout	Latex code	Package to include
ć	<code>\'c</code>	standard
Ć	<code>\'C</code>	standard
č	<code>\v{c}</code>	standard
Č	<code>\v{C}</code>	standard
đ	<code>\dj</code>	<code>\usepackage[T1]{fontenc}</code>
Đ	<code>\DJ</code>	<code>\usepackage[T1]{fontenc}</code>
dž	<code>d\v{z}</code>	standard
Dž	<code>D\v{z}</code>	standard
š	<code>\v{s}</code>	standard
Š	<code>\v{S}</code>	standard
ž	<code>\v{z}</code>	standard
Ž	<code>\v{Z}</code>	standard
